

Course 2023-2024 in Sustainable Finance

Lecture 6. Engagement & Voting Policy

Thierry Roncalli*

*Amundi Asset Management¹

*University of Paris-Saclay

March 2024

¹The opinions expressed in this presentation are those of the authors and are not meant to represent the opinions or official positions of Amundi Asset Management.

Agenda

- Lecture 1: Introduction
- Lecture 2: ESG Scoring
- Lecture 3: Impact of ESG Investing on Asset Prices and Portfolio Returns
- Lecture 4: Sustainable Financial Products
- Lecture 5: Impact Investing
- **Lecture 6: Engagement & Voting Policy**
- Lecture 7: Extra-financial Accounting
- Lecture 8: Awareness of Climate Change Impacts
- Lecture 9: The Ecosystem of Climate Change
- Lecture 10: Economic Models & Climate Change
- Lecture 11: Climate Risk Measures
- Lecture 12: Transition Risk Modeling
- Lecture 13: Climate Portfolio Construction
- Lecture 14: Physical Risk Modeling
- Lecture 15: Climate Stress Testing & Risk Management

Stewardship vs. engagement

Voting \subset Engagement \subset Stewardship

Stewardship vs. engagement

Figure 1: Difference between stewardship and engagement reports

Amundi Stewardship
Report (2021)

Amundi Engagement
Report (2021)

Stewardship

“It guides investors on how to implement the PRI’s Principle 2, which sets out signatories’ commitment to stewardship, stating: we will be active owners and incorporate ESG issues into our ownership policies and practices. [...] The PRI defines stewardship as the use of influence by institutional investors to maximise overall long-term value including the value of common economic, social and environmental assets, on which returns and clients’ and beneficiaries’ interests depend.” (PRI, 2021).

Definition

Active ownership \approx Engagement \approx Shareholder activism

“investors who, dissatisfied with some aspect of a company’s management or operations, try to bring about change within the company without a change in control” Gillan and Starks (2000).

Definition

- Conflicting interests between shareholders and management (separation between ownership and control)
- Stakeholder theory (Freeman, 2004)

Milton Friedman (1970)

“the social responsibility of business is to increase its profits”

Peter Drucker (1954)

“leaders in every single institution and in every single sector ... have two responsibilities. They are responsible and accountable for the performance of their institutions, and that requires them and their institutions to be concentrated, focused, limited. They are responsible also, however, for the community as a whole”

Shareholder activism

Shareholder activism can take various forms

- 1 Engage behind the scene with management and the board
- 2 Propose resolutions (shareholder proposals)
- 3 Vote (form coalition/express dissent/call back lent shares)
- 4 Voice displeasure publicly (in the media)
- 5 Initiate a takeover (acquire a sizable equity share)
- 6 Exit (sell shares, take an offsetting bet)

Source: Bekjarovski and Brière (2018)

Engage behind the scenes

“Behind the curtain engagement involves private communication between activist shareholders and the firm’s board or management, that tends to precede public measures such as vote, shareholder proposals and voice. In a sense, the existence of other forms of public activism can be taken as a signal that behind the scene engagements were unsuccessful. When it comes to environmental and social issues, writing to the board or management is a common method through which shareholders can express concern and attempt to influence corporate policy behind the curtain; alternatively, face to face meetings with management or non-executive directors are a more common behind the scene engagement method when it comes to governance.” Bekjarovski and Brière (2018).

Engage behind the scenes

Three families of engagement:

- 1 on-going engagement, where the goal for investors is to explain their ESG policy and collect information from the company. For instance, they can encourage companies to adopt best ESG practices, alert companies on ESG risks or better understand sectorial ESG challenges;
- 2 engagement for influence (or protest), where the goal is to express dissatisfaction with respect to some ESG issues, make recommendations to the firm and measure/control ESG progress of companies;
- 3 pre-AGM engagement, where the goal is to discuss with companies any resolution items that the investor may vote against.

Engage behind the scenes

The three steps of identification are:

- 1 List of engagement issues
- 2 Screening of companies
- 3 List of targeted companies

The different stages of engagement tracking are:

- Issues are raised to the company;
- Issues are acknowledged by the company;
- The company develops a strategy to address the issues;
- The company implements changes and the issues are resolved;
- The company did not solve the issues and the engagement failed.

Propose resolutions

According to the SEC (Securities Exchange Act Rule 14a-8, §240):

“a shareholder proposal or resolution is a recommendation or requirement that the company and/or its board of directors take action, which the shareholder intend to present at a meeting of the company’s shareholders. The proposal should state as clearly as possible the course of action that the shareholder believes the company should follow. If the proposal is placed on the company’s proxy card, the company must also provide in the form of proxy means for shareholders to specify by boxes a choice between approval or disapproval, or abstention.”

Propose resolutions

Threshold criteria:

- US: \$2 000 + No-action letter
- France, Germany and UK: 5% of the capital
- Italy: 2.5% of the capital
- Netherlands: 0.33%
- Spain: 3% of the capital

⇒ Collective shareholder proposals

Shareholder resolution = Escalation

Propose resolutions

Some figures (Russell 300 & 2022 proxy season)

- 98% of proposals are filed by the management, while less than 2% corresponds to shareholder resolutions;
- Only 60% of shareholder resolutions are voted; The other 40% are omitted, not presented, withdrawn or pending;
- The average number of proposals per company is around two;
- The proponents of shareholder resolutions are concentrated on a small number of investors or organisations (15 proponents were responsible of 75% of shareholder proposals);
- The repartition of shareholder proposals voted in 2022 was the following: 11% related to **E** issues, 41% related to **S** issues and 48% related to **G** issues

Vote

- Historical perspectives
- Importance of voting associations and NGOs
- US \succ Europe
- The concept of proxy voting
 - Institutional Shareholder Services (ISS)
 - Glass Lewis
- Say on Pay (2002)
 - Support rate for Russell 3000 companies: 87% in 2022 (from 15.4% to 99%)
 - Results for Germany, France and Spain
- Say on Climate (2020)

Vote

Figure 2: Average support rate of shareholder proposals (Russell 3000 companies)

Source: PwC's Governance Insights Center (2022).

Vote

Some figures with Russell 3000 companies

- 555 shareholder resolutions have been voted
- Only 82 have received majority support
- This means that one shareholder resolution was adopted for 37 companies!

What is the efficiency of vote? \neq What is the impact of vote?

Vote

Figure 3: Pass rate of shareholder proposals (Russell 3000 companies)

Source: Tonello (2022).

Voice

- 1970: Publication of the book *Exit, Voice, and Loyalty: Responses to Decline in Firms, Organizations, and States* by the economist Albert Hirschman
- Exist-voice model: exist **versus** voice or exit **and** voice
- Voice as a form of escalation
- Impact of collaborative engagement (e.g., Climate Action 100+)
- Increasing involvement of NGOs in the debate on engagement and greenwashing

Initiate a takeover

⇒ Hedge funds

Exit

- **Exit** refers to the process of selling off investments in a particular company or industry
- **Divestment** is a more general term that implies a significant exposure reduction
- Divestment: Final step in an escalation strategy?

Figure 4: What kinds of institutions are divesting from fossil fuel?

Source: <https://divestmentdatabase.org>.

Exit

Case study: the Cambridge University endowment fund

“A dilemma faced by an increasing number of investors is whether to divest from environmentally damaging businesses or whether to enter into a dialogue with them. This predicament now has its epicentre in Cambridge, England, where the ancient University of Cambridge faces great pressure from students and staff to respond to the threat of climate breakdown. Having already received two reports on its approach to responsible investment, the university has appointed a new chief investment officer (CIO) who, alongside University Council and the wider university community, needs to consider the question of whether to divest from or to engage with fossil-fuel firms.” Chambers et al. (2020).

Exit

Case study: Church of England Pensions Board

In 2020, they engaged with 21 companies. At the end of the process, 12 companies were supposed to make sufficient progress, while 9 companies were added to the list of restricted investments. These divestments totalled £32.23 mn (wrt £3.7 bn of assets under management).

Exit

Case study: The Universities Superannuation Scheme (USS)

- USS manage about £90 bn
- In 2020, they excluded certain sectors: tobacco manufacturing; thermal coal mining (coal to be burned for electricity generation), specifically where they made up more than 25% of revenues, and certain controversial weapons
- The first exclusion was announced in May 2020
- Two years after, divestment from these sectors is completed
- Ethics for USS \Rightarrow USS should extend its divestment policy

Individual vs. collaborative engagement

The role of institutional investors

Impact of active ownership

Voting process

- *“The company sets the agenda for the annual shareholder meeting;*
- *The custodian confirms the identity of the shareholders and the number of shares eligible for voting – often for a specific date ahead of the meeting (record date);*
- *Shareholders receive the meeting materials from the company (may be before or after the record date);*
- *Shareholders procuring proxy advisory services receive voting recommendations;*
- *Shareholders instruct the custodian on how to vote, often through a proxy voting service provider, within a deadline ahead of the shareholder meeting (cut-off date);*
- *Voting takes place at the shareholder meeting;*
- *Shareholders receive confirmation from the service provider that their voting instructions have been carried out.”*

Source: ShareAction (2019, 2020, 2021, 2023) & Author's calculations.

Asset managers

Main findings

- 1 *“49 additional resolutions would have received majority support if the largest asset managers had voted in favour of them.”*
- 2 *Voting performance has been stagnant in the US and the UK compared to 2021, while European asset managers have shown a large improvement.*
- 3 *Asset managers across the board are hesitant to back action-oriented resolutions, which would have the most transformative impact on environmental and social issues.”*
